Subject: Agreement to distribute technology written against the
Unicorn/Symphony APIs

This letter confirms your ability to distribute your Unicorn/Symphony API developed technology (applications, programs or scripts) to any current SirsiDynix customer under the following conditions:

- Your technology can be deployed on a Unicorn or Symphony server assuming the customer agrees and allows you to place those binaries on their server
- The deployment may consist of RO (read-only) use of SirsiDynix APIs
- The deployment may consist of RW (read-write) use of SirsiDynix APIs
- Your API developed technology may be deployed and discussed only with any current SirsiDynix customer.

Note that by allowing you to deploy your API developed technology, SirsiDynix is not taking support responsibility for any harm or damages caused by the deployment or use of that technology and you agree to fully disclose to the customer your responsibility for any such harm or damaged caused by your technology. SirsiDynix standard support policies are available and remain in effect for SirsiDynix customers.

You are free to publish and discuss the technical details of your solution but do not include discussions of the various low-level SirsiDynix APIs at this time. We are actively looking at options for opening our API to a broader audience but this has not yet been finalized.

SirsiDynix does not waive any rights or provisions under any agreements executed between the parties, nor does SirsiDynix grant any intellectual property rights or additional licensing rights to you in any of SirsiDynix intellectual property.

"You" is defined as Lehigh University and the VUFind project team and all individuals involved in the project in all capacities, paid or unpaid. It is the responsibility of Lehigh University and the VUFind project team to communicate such to all individuals working on this project.

We look to the developer community to provide applications and enhancements to the SirsiDynix products and value your efforts in this area.

We look forward to your success, please keep us updated as to your progress.

Best regards,

SirsiDynix

A handwritten signature in black ink, appearing to read "Talin Bingham". The signature is fluid and cursive, with a large initial "T" and a long, sweeping underline.
